
1 Identify records in Google Scholar
Search three topics: landmarks in sign recognition, missed hand detections, and image preprocessing.
Records saved across searches: $n =$ ___
Duplicate records
Removed before screening: $n =$ ___
2 Screen titles and abstracts
Unique records screened: $n =$ ___
Outside RQ2 scope
Records excluded: $n =$ ___
3 Retrieve full texts
Reports sought: $n =$ ___
Full text unavailable
Reports not retrieved: $n =$ ___
4 Assess full-text eligibility
Retain direct evidence on hand detection after preprocessing or background on the detector and the use of landmarks in sign recognition.
Reports assessed: $n =$ ___
Full texts excluded
Record one primary reason per report, e.g. unrelated task or no relevant method or outcome.
Total excluded: $n =$ ___
5 Include publications in Related Works
Publications included: $n =$ ___
Distinguish direct evidence from background.
